

Lab #3

Chapters 2 ~ 3:
cp1 **and** who3

Young-Kyoon Suh
Kyungpook National University

Lab #3-1: Writing `cp1`

- Write `cp1` covered on Slides 23-30 in Chapter 2.
- Compile `cp1.c` and compare its result with `cp`.
 - Make sure its output should be the same as `cp`'s output.
- Submission: `cp1.c`, and `cp1`

Lab #3-2: Writing `who3`

- Implement `who3` on Slides 41-45 in Chapter 2.
 - (Perhaps, you will have to write `who2` first.)
- Compile `who3.c` and compare its result with `who`.
 - Make sure that your executable code (`who3`) must work properly.
- Submission: `utmp.lib.c`, `who3.c`, and `who3`

Lab #3: Submission

- Deadline: **Tomorrow Midnight** (03/17/2023)
 - Create a directory named `lab3_s<StudentID>.zip`
 - Copy all the source code into that directory.
 - Zip the directory and name it like: `lab3_s2018112544.zip`.
 - Upload your zip file into LMS.
